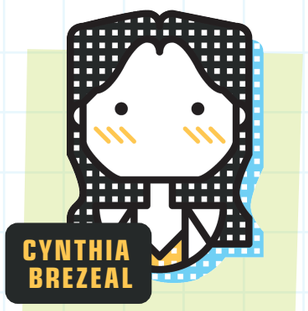
FEMTECH

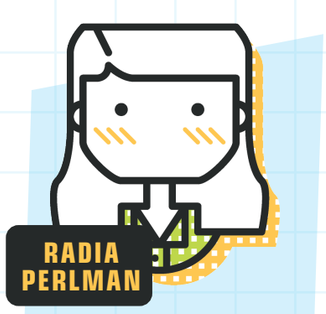
WOMEN IN TECHNOLOGY

FEMTECH is a conference that inspires women to pursue their dreams in technology by providing speakers that are doing just that. These women are inventing, game developing, engineering, designing, educating, and programming to change the world. With today's innovations they're pushing the boundaries and making the world a better place.



CYNTHIA BREZEAL

Inventor and founder of the Jibo project. A new look at robot technology

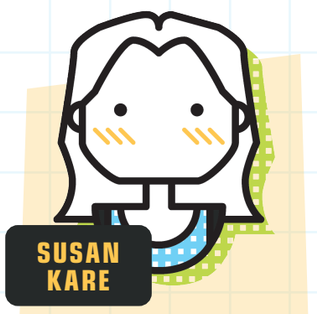


RADIA PERLMAN

Programmer that made the algorithm for FTP protocol, a huge asset to the web

RAMONA PIERSON

Educator that is using technology to discover and optimize how we learn

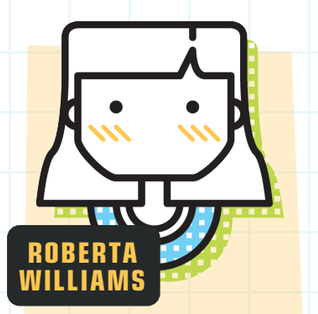


SUSAN KARE

Designer that made the iconic and original Apple interface that is still used today

DANIELLE FONG

Engineer that is fighting to make the world's electrical grid more green



ROBERTA WILLIAMS
